

## Economic Plank

Our economic beliefs are to make more jobs for our fellow Americans and stop having other countries do what we as Americans can do also the reason I believe that we should have more jobs in America is 5.1 percent which is down but I believe that I can make that number cut it in half which by making more jobs in America will help drop that number dramatically and I will help keep it that way so it just doesn't get there and go back up I will change America for the best and that is a promise also I would like to fix that horrible national debt that we have The National Debt has continued to increase an average of \$1.90 billion per day since September 30, 2012 which is just terrible I will try to fix that debt I can't get rid of it completely but I will promise to fix it to the best of my ability which will be don't by cutting that 1.90 billion a day down by half which is my goal how will I do this you ask I will make budget cuts where it's needed but keep then where it's important like the school systems where we need to put more money in because as of right now the future leaders of America is not a top priority which doesn't make any since I believe that the students should be a top priority what we do today won't help if the future leaders don't have a proper education
